

.NET professional with 3 years of experience specializing in C#, HTML, CSS, Bootstrap, and SQL. Strong background in software development and application design, with a solid understanding of full-stack development and database management.

WORK EXPERIENCE

Senior Software Developer

Infologia Technologies Private Limited

03/2022 - PresentChennai, India

Achievements/Tasks

- Developed and implemented a full-stack website using ASP.NET C#.
- Designed a user-friendly front-end and built robust back-end services for product management and user accounts. Utilized Entity Framework for data access and optimized website performance for a seamless user experience.
- Developed a complete flow for reading, extracting, and saving datasets to a database using a .NET Windows service.
- Created database structures, queries, and stored procedures using SQL and Microsoft SQL Server
- Leading frontend development for an in-built logistics application using Angular, overseeing the creation of multiple webpages and optimizing user experience.
- Participated in code reviews to maintain coding standards and best practices. Collaborated with cross-functional teams to gather requirements and deliver high-quality solutions.

EDUCATION

MBA Finance

Shrimati Indira Gandhi College,

07/2019 - 08/2021

B.Sc Mathematics

Shrimati Indira Gandhi College,

06/2016 - 05/2019

Higher Secondary

JC Kumarappa Matriculation Higher Secondary School

06/2014 - 03/2016

SKILLS

ASP.NETC#SQLHTMLCSS

BootstrapDebugXMLSwagger

AngularNodeJS

ACHIEVEMENTS

Best Performer of the Month - November 2022

Best Performer of the Month- March 2023

PROJECTS

New Globe Logistik LLP: Track and Trace

(03/2022 - Present)

- Developed a real-time cargo tracking web application built on .NET Framework C#. This application provides transparency throughout the shipment journey by effortlessly tracking shipments and delivering prompt updates to users.

New Globe Logistik LLP: Performance Dashboard

(03/2022 - Present)

- Developed a high-performance web service to process and curate large shipment datasets from Excel/ CSV files. Designed the service to efficiently load the cleansed data into a database. Service is built on .NET Framework window service.

International Cargowise Logistics

(01/2024 - 05/2024)

- Developed a high-performance web service flow which involves the file transfer for extracting and reading the XML files. Designed the service to efficiently load the cleansed data into a database. Service is built on .NET Framework window service.

Dahnay Logistics (09/2024 - 02/2025)

- Developed and maintained a backend application to receive, process, and store logistics data from clients. Implemented real-time shipment tracking and automated client updates at predefined intervals. Designed and optimized API endpoints to efficiently handle and process large volumes of tracking data.
